DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 USC 121:

I. Claims 1-6, and 20-23, drawn to an echinocandin/ carbohydrate complex, classified in class 514, subclass 9.

II. Claims 7-19, drawn to a method of making the echinocandin/ carbohydrate complex, classified in class 514, subclass 9.

III. Claims 24-27, drawn to a method of treating fungal infection, classified in class 435, subclass 178.

This application also contains claims directed to the following patentably distinct species of the claimed invention:

Select one R group, claims 1 and 7, further select one R in claims 2 and 8.

Select one from each R1-R10 group, claims 1 and 7.

Select one from the carbohydrate group of claims 4 and 10.

Select one from the carbohydrate group of claims 5, 6, 11, and 12.

Select one of the solvents group of claim 13 and 14.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1654

The inventions of groups I, II, and III have different modes of operation, different functions and different effects (MPEP 806.04, MPEP 808.01). The invention of group I is that of a compound. The invention of group II is that of a method of preparation. The invention of group III is that of a method of treatment.

Because these inventions are distinct for the reasons given above and since they have acquired a separate status in the art as shown by their different classification and/or divergent subject matter, and/or are separately and independently searched, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirements be traversed.
